

GIDEON → SC-300 Quick Reference

John Christopher SC-300 Course → GIDEON Scenario Map | idaibsec.onmicrosoft.com

HOW TO USE: 1) Note the topic Christopher is covering 2) Find the matching row below 3) Run GIDEON and select the Domain 4) Keep re-running until you get the Scenario ID shown 5) Answer the PBQ, then check model answers

Christopher covers...	GIDEON Scenario ID	How to find it in GIDEON
Domain 1 · Implement and Manage User Identities · 20–25%		
Tenant config, admin roles, company branding, guest settings	SC1-001	GIDEON → Domain 1 → any scenario Look for ID SC1-001 in output
Bulk user creation, dynamic groups, licensing, custom attributes	SC1-002	GIDEON → Domain 1 Look for ID SC1-002 in output
Hybrid identity, Entra Connect, PHS vs PTA vs AD FS, Seamless SSO	SC1-003	GIDEON → Domain 1 Look for ID SC1-003 in output
External identities, B2B, Google federation, cross-tenant access	SC1-004	GIDEON → Domain 1 Look for ID SC1-004 in output
Domain 2 · Implement Authentication and Access Management · 25–30%		
Conditional Access design, report-only, auth context, What If tool	SC2-001	GIDEON → Domain 2 Look for ID SC2-001 in output
MFA methods, SSPR, WHfB, FIDO2, per-user MFA migration	SC2-002	GIDEON → Domain 2 Look for ID SC2-002 in output
ID Protection, user/sign-in risk, risk policies, impossible travel	SC2-003	GIDEON → Domain 2 Look for ID SC2-003 in output
Global Secure Access, Private Access vs Internet Access, ZTNA, GSA client	SC2-004	GIDEON → Domain 2 Look for ID SC2-004 in output
Domain 3 · Plan and Implement Workload Identities · 20–25%		
Managed identities, service principals, AKS WIF, Key Vault, RBAC	SC3-001	GIDEON → Domain 3 Look for ID SC3-001 in output
Enterprise app SSO, SAML/OIDC, SCIM provisioning, App Proxy	SC3-002	GIDEON → Domain 3 Look for ID SC3-002 in output
App registrations, OAuth 2.0 flows, API permissions, certificates	SC3-003	GIDEON → Domain 3 Look for ID SC3-003 in output
Domain 4 · Plan and Automate Identity Governance · 25–30%		
PIM, eligible vs active, break-glass, PIM for Groups, Azure resource roles	SC4-001	GIDEON → Domain 4 Look for ID SC4-001 in output
Access Reviews, no-response settings, Lifecycle Workflows, offboarding	SC4-002	GIDEON → Domain 4 Look for ID SC4-002 in output
Entitlement Management, access packages, catalogs, connected orgs, Terms of Use	SC4-003	GIDEON → Domain 4 Look for ID SC4-004 in output
Monitoring, KQL, Workbooks, Diagnostic Settings, Secure Score	SC4-004	GIDEON → Domain 4 Look for ID SC4-004 in output

*TIP: GIDEON randomises variables each run — same scenario ID, different org names, numbers, and details. Run the same ID 3–4 times to see all variations.
Use Student Mode to answer first, then reveal model answers.*
